SBS INTRODUCES NEW PACKAGING FOR BRAKE SHOES

We are proud to present a new packaging solution for SBS motorcycle and scooter brake shoes. From now on, they will be packed and delivered in boxes.

Advantages:

- More stable packaging solution based on two box sizes
- Made of solid cardboard material to protect against transport damages
- "Tamper-proof" lock construction which protects against unauthorized opening of the box
- Highly branded artwork that emphasizes the quality profile of the SBS brand

We pack the box sizes individually on the containers. There is no minimum order size per reference.

For further information, please contact us.

SBS Friction A/S

SBS Friction A/S is world leader within development, production and sales of disc brake pads and friction solutions for motorcycles, scooters, motorsport and special applications, such as wind turbines.

Based on our vast friction knowhow, we supply both the OEM and aftermarket and offer a full range of compounds for street, off road and racing purposes.

SBS Friction is part of the SBS Group.
